

WHAT IS IT?

These next generation telephony solutions integrate your traditional telephone and voicemail services into a complete suite of mobile communications tools for your employees.

Harness the power of your data network to deliver superior voice and collaboration services. Eliminate your long distance costs and improve collaboration.

VoIP SOLUTION

→ JOIN THE VOIP REVOLUTION

- 1 **LEVERAGE OUR NETWORK** of strategic partnerships to reduce your recurring telephony costs
- 2 **WORK FROM ANYWHERE** improve the productivity and mobility of your workforce
- 3 **EASILY** add, move, or change phone users, extensions and locations
- 4 **REDUCE CAPITAL COSTS** and provide your employees the flexibility of BYOD
- 5 **SIMPLIFY** communications with SNR (Single Number Reach) and Unified Voicemail
- 6 **ENHANCE** conference calls with Cisco Conference Bridge and WebEx

→ UNIFIED COMMUNICATIONS

Unified communications solutions for small businesses go beyond basic VoIP capabilities in enhancing collaboration. With a unified communications solution, workers can easily collaborate through voice, video chat, Web conference, and instant messaging. Employees can work using each technology individually or all of them simultaneously, and from a single, easy-to-use interface.

→ VOIP TECHNOLOGY PARTNERS

Any successful small business shares the same technology requirements as a larger enterprise. Your small business workforce needs cutting-edge tools to compete in a global market. Bridge the budget gap and empower your business with enterprise technology solutions delivered at a small business price.

MBC Managed IT Services is proud to have been a Cisco Partner for several years. MBC holds Cisco certification specializations in technologies geared for small and midsize businesses as well as collaboration and unified communications.
