

MBC Endpoint Detection and Response (EDR)

EDR is a new group of tools and capabilities that focuses on the detection of suspicious activities on endpoints

MBCs Endpoint Detection and Response, powered by SentinelOne®, is an integrated feature of MBCs RMM Monitoring tool that can help prevent, detect, and respond to evolving cyber-threats to your employees endpoints. Go beyond traditional antivirus and protect yourself against ransomware, zero-day attacks and evolving online threats!

Detect Threats

- ▶ Artificial Intelligence Engines
- ▶ Real-Time Alerts
- ▶ Easy-to-Use Dashboard
- ▶ Executive Insights and Findings
- ▶ Forensics Data Analysis
- ▶ Threat Summaries
- ▶ Raw Data Report

Respond Effectively

- ▶ Custom Policies
- ▶ Multiple Recovery Options
- ▶ Enhanced Quarantine
- ▶ Custom Automation
- ▶ Automatic Rollback
- ▶ Rapid Deployment
- ▶ Integrated workflows

Prevent Cyber-Attacks

- ▶ Real-Time File Analysis
- ▶ Signatureless Approach
- ▶ Offline Protection
- ▶ Machine Learning
- ▶ Autonomous Action

Upgrade Now

Protect your desktops by upgrading to the new and improved MBC Endpoint Detection and Response security solution.
