

MBC Managed Endpoint Detection and Response

MBCs Managed Endpoint Detection and Response powered by SentinelOne® can help prevent, detect, and respond to evolving cyber-threats to your employees endpoints. We go beyond traditional antivirus and protect you against ransomware, zero-day attacks and other evolving online threats!

While Endpoint Detection and Response focuses on detecting and responding to threats at the endpoint level, Managed Detection and Response provides a comprehensive, outsourced service that encompasses monitoring, detection, and response across an organization's entire IT environment, including endpoints, networks, and cloud infrastructure.
