

MBC can deliver Microsoft Intune to give your employees the convenience while ensuring your data is protected!

MBC Mobile Management Solution - Microsoft Intune

Modern, cloud-based application and device management for a mobile-first, cloud-first world. With more devices than ever, there are increasing options for getting and staying connected. Employees expect to access their work email and documents from anywhere on any device—and they expect seamless, modern experiences.

WHAT YOU NEED

Your mobile environment is complex – get a diverse set of management tools

You need flexibility in how you manage and secure mobile productivity - get innovative combination of mobile application management and device management options

Manageability and data protection is important and thus built directly into the Office mobile apps your employees are most familiar with.

Stage implementation of modern management scenarios while targeting different devices the way that best suits your business needs.

And finally, you need to ensure that your data is protected while your employees stay productive

WHAT YOU GET

MBC Managed IT Services will implement and manage the Microsoft Intune solution, which is a future proof choice that will solve your needs today and easily scale as your needs evolve and change in the future.

Intune provides the data protection your business requires, while giving your employees access to the tools that make them most productive. You get an extensible admin experience integrated with the rest of the EMS, and the support you need to ensure your data is protected.

Our unique ability to manage Office apps gives you control without the need for traditional containerization or clunky work around apps.

Conditional access combines the power of Intune and Azure Active Directory Premium, allowing you to define policies that provide contextual controls at the user, location, device, and app levels. Natural prompts ensure that only the right users on compliant devices can access sensitive data.

Our expert support team keeps you running strong and protected 24/7.

Delivering DELIGHTFUL IT
