

Rely on an experienced, well rounded IT team that is responsive, knowledgeable and honest for a fraction of your current IT spend.

The ROI of IT MANAGED SERVICES

## → CONSIDER THIS

- For 30+ users, more than 1 IT specialist is required on staff
- You are looking at a minimum of **11k** per month on salaries alone. Off hours – not included.
- The breadth of expertise can be limiting and IT innovation suffers
- Turnover is high and staffing will be tough
- Your senior resource is on vacation and you have a network outage

## → WHAT YOU GET FOR LESS

- 1 One monthly fee for total IT support
- 2 A comprehensive solution to manage and monitor your entire infrastructure
- 3 Structured response and maintenance agreement
- 4 Support plan that is tailored to your needs
- 5 Strategic approach to IT management, build on a solid tactical execution
- 6 Total alignment of your budgets and goals

A True IT Partnership

Delivering **DELIGHTFUL IT**
